

# ■ SYNAPZ — Artificial Intelligence Network

## Version 1.0 – November 2025

Network: Solana (SPL Token) | Ticker: SYNAPZ

Contract Address: HfJvxwLQeHeiDz8e91RWSwMm3R1pLh1vyjLoSr5gpump

Total Supply: 1 Billion SYNAPZ | Decimals: 9

Website: <https://synapz.ai> | Twitter: @SYNAPZ\_DEV | Telegram: t.me/SYNAPZOFFICAL

## 1. Overview

SYNAPZ is the world's first AI-driven meme intelligence network built on the Solana blockchain. It unites Artificial Intelligence, Meme Culture, and Robotics into one evolving ecosystem where every token holder acts as a neuron within a living, decentralized brain. SYNPZ learns from community behaviour, generating data, content, and on-chain activity that strengthens the network's intelligence.

## 2. Vision & Mission

**Vision:** To create the first self-learning digital intelligence powered by blockchain consensus and community engagement.

**Mission:** To bridge human creativity and machine learning—transforming memes, AI, and robotics into a single revenue-producing ecosystem that rewards participants for every signal they contribute.

## 3. Technology Stack

- Blockchain: Solana SPL infrastructure with high throughput and low fees.
- Smart Contracts: Non-custodial staking, rewards, and DAO functions.
- AI Core: Cloud-based neural agents learning from social data and on-chain metrics.
- Frontend App: React Native interface for wallet connection, staking, and AI access.
- Backend Indexers: Node.js + PostgreSQL stack streaming Solana events for analytics.

## 4. Tokenomics

Community & Liquidity – 60% (locked)

Treasury & Development – 20%

Marketing & Partnerships – 10%

Team & Advisors – 5%

Airdrops & Rewards – 5%

Supply: Fixed 1B SYNAPZ | Minting: Disabled | Liquidity: Locked

## 5. Utility & Use Cases

1. AI Agent Access
2. Staking & Rewards
3. NFT & Avatar Creation
4. RWA Revenue Integration

## 5. Governance & DAO Voting

## 6. Roadmap

Q4 2025 – Token launch, website, AI V1 integration  
Q1 2026 – Mobile app beta, staking and rewards  
Q2 2026 – NFT avatar engine + swarm learning module  
Q3 2026 – Robotics API integration + cross-chain bridge  
Q4 2026 – DAO governance + RWA revenue streams

## 7. Security & Transparency

Audits by independent Solana auditors pre-mainnet.  
Liquidity locked via Pump.fun bond mechanism.  
Public repository: [github.com/SYNAPZAI/synapz](https://github.com/SYNAPZAI/synapz)  
Team verification in progress for exchange listings.

## 8. Disclaimer

SYNAPZ tokens represent utility within the SYNAPZ ecosystem and should not be considered securities. Participation is voluntary and subject to market risk. Information may evolve as development progresses.
